

700 SERIES Electrotherapy, Ultrasound & Light Therapy

Dynatron 709™

Dynatron 705™

Dynatron 708™

SOLARIS

Dynatron 701™

Dynatron 706™

Dynatron 702™

Dynatron XP™

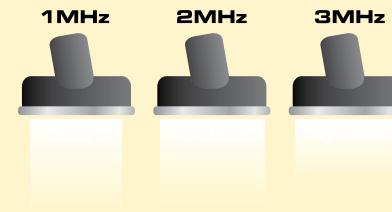

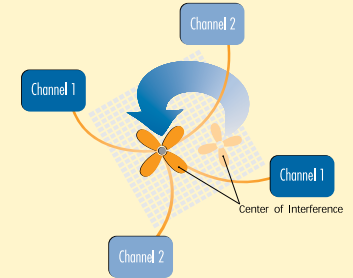

Dynatronics has combined the popular features of the 50 Series Plus™ line with Light Therapy and Direct Current to create the revolutionary Solaris Series. Solaris offers the most options in any one device by including Ultrasound, seven Stim waveforms, and the option of adding Light Therapy.

D709*	5 channel combo unit w/ one soundhead	\$4,395
D708*	3 channel combo unit w/ one soundhead	\$3,795
D706*	5 channel stim	\$3,195
D705*	3 channel stim	\$2,595
D701*	Ultrasound w/ one soundhead	\$2,595
D702*	Stand-alone Light Unit	\$1,895

* Light probes & Light pads sold separately

Patented Target and Target Sweep

By focusing the treatment precisely where it is needed, Dynatronics' unique TARGET feature provides a more effective interferential treatment. Simply glide your finger across the TARGET touch pad to move the center of interference to the site of your patient's pain.

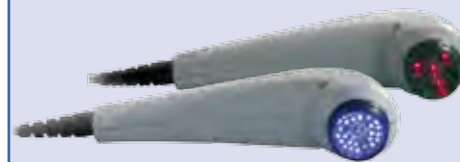

Patented 3-Frequency Ultrasound

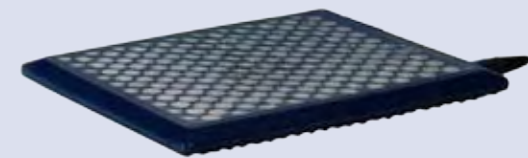

The only Ultrasound devices in the industry offering 1, 2, and 3 MHz frequencies for the greatest flexibility in depth of treatment.

Add Light Therapy...

Choose from a wide variety of optional light accessories ranging in power from 500 mW to 7,500 mW.

D880plus - Red/IR Light Probe
D405 - Blue/IR Light Probe

XP - IR Light Pad

The Dynatron X3™ allows 3 independent treatments (2 pads and 1 probe) and is capable of delivering 16,000 mW of light. With its state-of-the-art touch screen, the Dynatron X3 is also simple to operate.

While light probes remain the preferred method for treating extremities and smaller areas, the new Dynatron XP™ Light Pad finally makes treating larger areas practical, and best of all, UNATTENDED! In addition to size and power, the Dynatron XP Light Pad is also flexible.

X3* Light Unit \$2,895

* Light probes & Light pads sold separately

880plus Light Probe
(1,000 mW)

Dynatron XP™ Light Pad
(7,500 mW each)

Model #	Power	Wavelength	Color	Diode Type	Price
Probes					
405	500 mW	880 / 405 nm	IR / Blue	SLD	\$1,895
880plus	1,000 mW	880 / 660 nm	IR / Red	SLD	\$1,895
890**	625 mW	875 / 660 nm	IR / Red	Laser / SLD	\$2,395
Light Pad					
XP**	7,500 mW	880 nm	IR	SLD	\$2,395

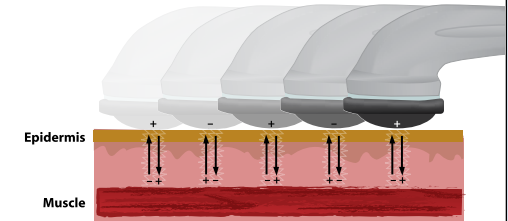

**Patent and Patent Pending

THE Dynatron X5™ TURBO

X5 \$4,995

How the X5 works

The unique construction utilizes a non-conductive layer to prevent current flow, thus creating an electrostatic field between the probe / gloves and the tissue.

By quickly alternating the polarity, a vibratory / mechanical action is created which is highly effective in the treatment of both acute and chronic pain.

Treatments are fast, comfortable, and easy to apply.

LOCKNLOAD™

Dual Adjustable Pulley

The Instinct Strength Dual Adjustable Pulley exemplifies ease of use. By minimizing user adjustments, it is possible to start a workout immediately upon machine entry.

- Large instructional placards identify twelve basic exercises, ideal for an unsupervised environment.
- Attachable accessories enable numerous additional exercises.
- Trigger-style pulley mechanism allows for one-handed easy adjustment.
- Space saving footprint maximizes floor space.

Dimensions: 36"W x 66"L x 88"H
 Weight Stack: (2) 235 lbs
 Ship: 894 lbs

Dual Abdominal/Lower Back
 Dim: 40"W x 45"L x 55"H
 Weight Stack: 120 lbs
 Ship: 369 lbs

Dual Inner/Outer Thigh
 Dim: 27"W x 57"L x 55"H
 Weight Stack: 150 lbs
 Ship: 498 lbs

Dual Biceps Curl/Triceps Extension
 Dim: 39"W x 52"L x 55"H
 Weight Stack: 190 lbs
 Ship: 425 lbs

Optional **LockNLoad™** system features an ergonomically designed on/off switch and internal, patented pinless system that engages and disengages the weight of your choice with the flip of a switch.

RehabPro Pulleys

Base Strength Benefits

HumanSport strengthens individual muscle groups with outside stabilization, helping prepare and build the muscles used in training, while developing flexibility and stability.

Core Stabilization Benefits

HumanSport's integration of core stabilization and multi-planar movements helps strengthen core muscles to achieve overall strength and balance - enabling users to perform better and get more out of individual muscle group workouts.

Dynamic Movement Benefits

HumanSport doesn't allow the user to depend on linear, machine-like movement for proper form. Instead, its dynamic movement trains the muscles from an infinite number of angles for a broader range of movement, strength, flexibility and balance.

The Power of Recovery

Game Ready offers adjustable cold therapy and intermittent compression in one easy-to-use system, making it easy for you to apply the two most difficult-to-manage aspects of the RICE regimen.

What makes Game Ready different is a unique combination of active compression and circumferential cold therapy, comfortable form-fitting anatomic wraps, and adjustable pressure and temperature settings, all in a state-of-the-art system.
